

Con l'esercizio di oggi ho creato una regola che mi blocchi l'accesso sul Firewall sulla pagina di Dvwa di metasploitable mentre entrambe le macchine sono su reti diverse

The screenshot shows the pfSense web interface in a browser. The address bar indicates the URL is `https://192.168.1.1/firewall_rules.php?if=lan`. A green notification banner at the top states: "The changes have been applied successfully. The firewall rules are now reloading in the background. Monitor the filter reload progress." Below this, the "Rules" tab is selected for the LAN interface. The table below lists the current firewall rules.

Rules (Drag to Change Order)											
<input type="checkbox"/>	States	Protocol	Source	Port	Destination	Port	Gateway	Queue	Schedule	Description	Actions
<input checked="" type="checkbox"/>	✓ 0/220 KiB	*	*	*	LAN1 Address	443	*	*		Anti-Lockout Rule	
<input type="checkbox"/>	✗ 0/0 B	IPv4 *	192.168.1.100/24	*	192.168.32.101/24	*	*	none			
<input type="checkbox"/>	✓ 0/41 KiB	IPv4 *	192.168.1.100/24	*	192.168.32.101/24	*	*	none			
<input type="checkbox"/>	✓ 0/0 B	IPv6 *	LAN1 subnets	*	*	*	*	none		Default allow LAN IPv6 to any rule	

At the bottom of the table are buttons: Add (up arrow), Add (down arrow), Delete, Toggle, Copy, Save, and Separator.
